Enerpac Industrial Tools

RC-Series DUO Cylinders

RCH-Series Hollow Plunger Cylinders

Lightweight Aluminum Cylinders

P-Series Lightweight Hand Pumps

PA-Series Turbo II Air Hydraulic Pumps

P-Series ULTIMA Steel Hand Pump

XA-Series Air-Driven Hydraulic Pumps

Low Height Cylinders

Cylinder Pump Sets

High Tonnage Cylinders

PU-Series Economy Electric Pumps

ZE & ZU-Series Electric Pumps

ZA-Series Air Hydraulic Pumps

Split Flow Hydraulic Pump

General Tools
Cutters, Punchers, Maintenance

Hydraulic Presses
Standard & Customized

Pipe Benders

Mechanical Roller Sackates

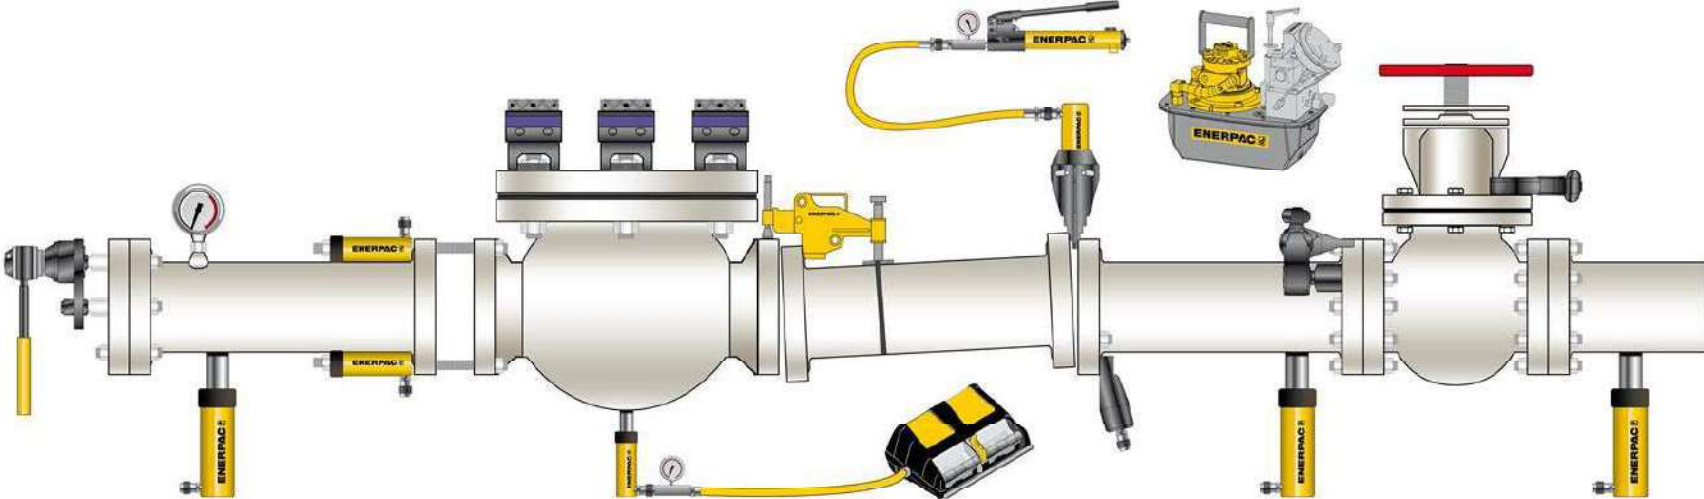

Mechanical & Hydraulic Pullers

System Components
Hoses, Fittings, Gauges, Valves..

Enerpac Bolting Tools

Joint Assembly Tools

Hydraulic Torque Wrenches

Hydraulic Tensioners

Hydraulic Torque Wrench Pumps

Hydraulic/Manual Flange Spreaders

Hydraulic Nut Splitters

Enerpac Heavy Lifting

Hydraulic Gentries

Strand Jacks

Skidding Systems

Jack-Up Systems

Synchronous Lifting System

Self-Propelled Modular Unit (SPMU)

Synchronous Hoist Systems

Mirage Machines

MIRAGE

Flange Facing

Orbital Milling

Pipe cutting

Diamond wire saw

Band saw

Hot tap & Line stop

Linear mills

Drilling & Tapping

Line boring

Power supplies & tooling

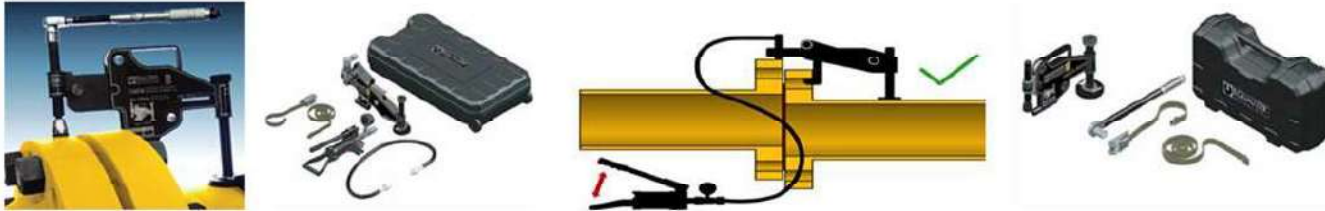

Shaft Machining

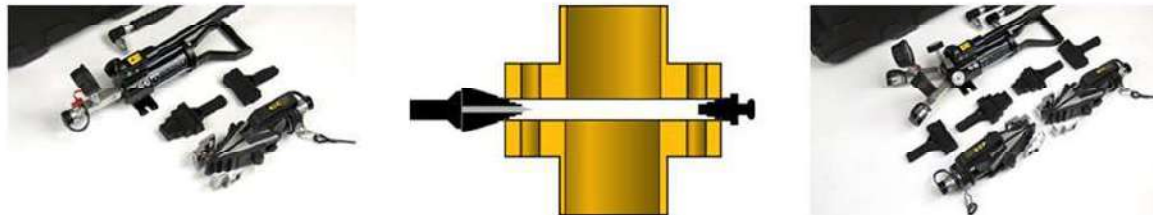

Custom engineering

Equalizer Flange Tools

Flange Alignment Tool FA Mechanical and Hydraulic Range

Flange Spreading SWi Wedge Type

Flange Spreading SG Secure Grip Range

Flange Spreading SG Secure Grip In-Line Range

Hydratight Tools

hydratight

Joint Integrity Management
 We assist our clients with the development and implementation of a best practice Assured Joint Integrity program, ensuring assets and installations have the safest bolted joints possible

Machining Services
 On-site services such as turning, drilling, milling, heat treating and grinding of plant components performed by competent Hydratight technicians

Bolting Services
 Trained and competent service teams assure that all bolting operations are carried out efficiently and safely

Machining
 Tools that cut, bevel, bore, grind, mill, and tube prep

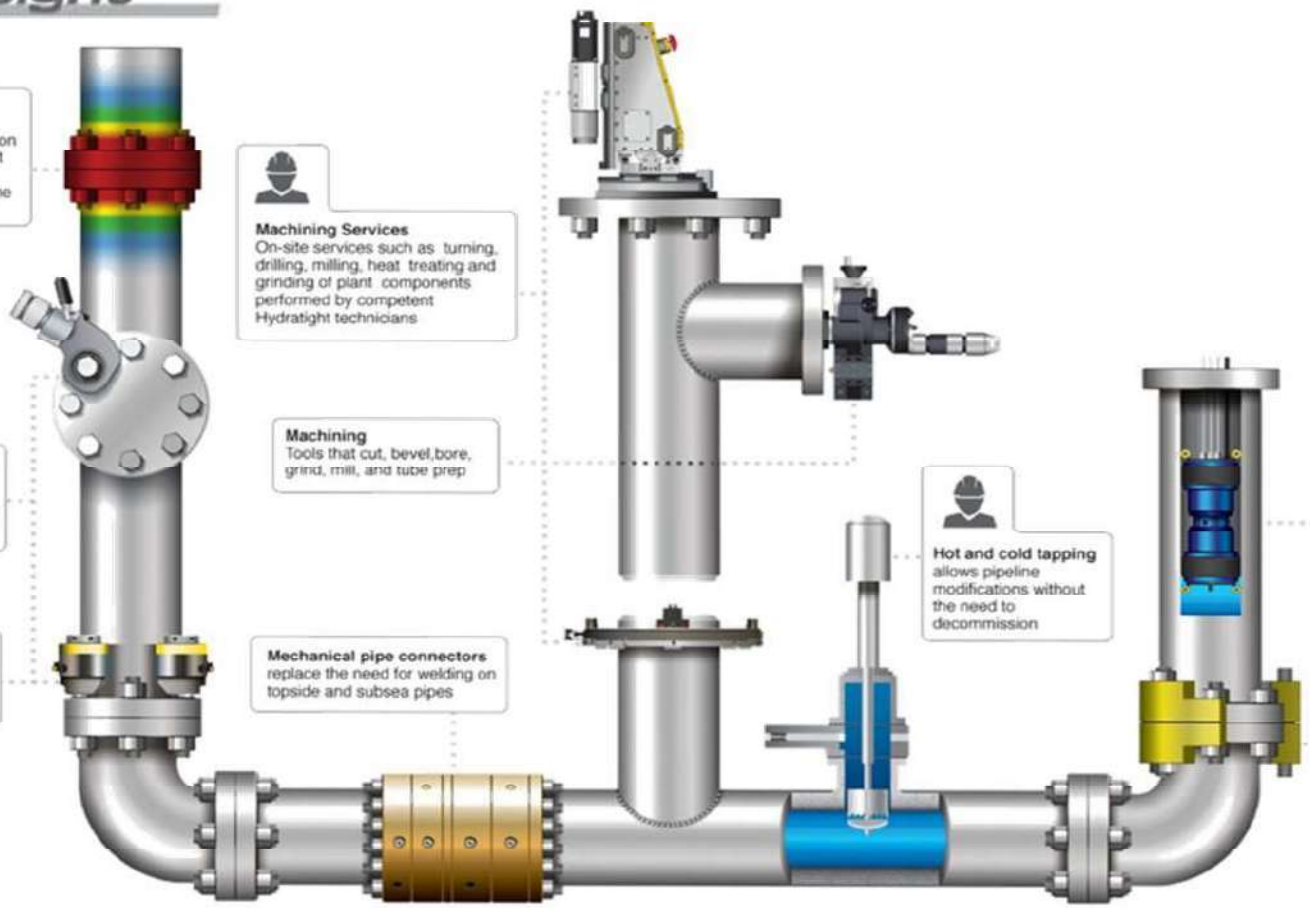

Hot and cold tapping
 allows pipeline modifications without the need to decommission

Torque and Tension Tools
 Achieve proper tightening or loosening of a connection through the use of hydraulics

Mechanical pipe connectors
 replace the need for welding on topside and subsea pipes

In-line weld testing
 Competent technicians provide safe, effective localized weld testing

Hot bolting
 Safe bolt replacement / renewal to online systems by competent Hydratight technicians

Why CHANGE

MAKE DOING BUSINESS EASIER WITH US

Simplify with fewer sales touch points

Consult with vast application and technical expertise

Optimize solutions leveraging an expanded offering of tools and services

Reduce effort by working with a single supplier

Support with local sales and channel partners
